

6516205807.txt

Dear Sirs:

XM Radio should be able to broadcast traffic and weather information.

Why is it when someone appears to have a better way of doing things the competition tries to buy a new law? Instead of competing and improving their services, they want the government to protect their businesses. The money and time invested for lobbyists and campaign contributions should be used to improve their product.

Our government needs to spend more time and energy solving much more important things than who can broadcast weather and traffic information.

Some examples may be:

1. Bringing home our troops (alive),
2. Homeland Security,
3. Controlling the cost of health needs, and
4. Quit decreasing what we already have.

For some reason, I believe the short, incomplete list above is much more important to the population of the United States people than who can broadcast weather and traffic information. Stop wasting your time and take care of the important matters.

David Stowe
